Press Release

*** **

On February 8, 2012, the S.W.A.T Team will be conducting training at the Beau Chene high school. The training is to educate the faculty of actions that will occur if the S.W.A.T team ever has to deploy to its school. It will be similar to an Active Shooter situation. This will not be large scale and will not involve patrol units, command post ect... We will have training signs posted and two of my officers will have marked units at the entry points of the school. The S.W.A.T truck will be utilized. There will be an active shooter situation once S.W.A.T makes entry and another scenario with a barricaded hostage taker without active shooter. We will probably deploy a medical evacuation situation with a wounded person as well. The school is having a faculty meeting on that date and will let out at 1300hrs. 1330hrs or so, we will initiate the training with faculty and some students. Our team will be training before hand beginning at 0645hrs of the same morning. Will be conducting a mission briefing and "rock drills" starting at around 1000hrs at the training center.
